CARBIDE-TIPPED BLADES

The Carbide-Tipped Blade is the keenest and most durable blade yet developed for cutting building materials! USERS have reported phenomenal results and drastic cost reductions such as:—"We cut Transite 8 times faster than with any other Blade or Abrasive Disc." . . . "Cemesto Board is now cut 8 to 10 times faster with only one sharpening in 15,000 linear feet." . . . "This Blade stays sharp 30 times longer than normal steel blade when cutting lumber." Almost every type of building material is cut with the same saving of time and cost. The secret, of course, is the Tungsten-Carbide Tips which are brazed into a special alloy steel blade. It has been established repeatedly that the diamond-like hardness of these tips will retain their cutting edges up to 50 times longer than steel.
